Synergy Networkx Ltd

Jan 2013 – Jun 2014 • 1 yr 6 mos

London, United Kingdom

My hands-on experience on the real Cisco network infrastructure during the training programme undergone at Synergy Networkx include the following:

- Implementing an EIGRP based Solution
- Implementing a Scalable Multiarea Network OSPF based Solution
- Implement an IPv4 based redistribution solution
- Create an eBGP implementation plan
- Determine network resources needed for implementing eBGP on a network
- Create an eBGP verification plan
- Configure eBGP routing
- Verify eBGP solution was implemented properly using show and debug commands
- Document verification results for an eBGP implementation plan
- Implement Path Control based upon the results of the redistribution analysis
- Connecting an Enterprise Network using ipv6
- Implementing VLANs in Campus Networks
- Implementing Spanning Tree
- Implementing Inter-VLAN Routing
- Configuring Switch Security & Minimizing Data Theft in a Campus Network
- Implementing First Hop Redundancy in a Campus Environment
- Troubleshooting NAT and PAT
